I am conscientious, reliable and keen to develop new skills. I am highly motivated and determined, with a can-do attitude I get great satisfaction from persevering, overcoming issues and seeing things through to completion. I am a good listener and enjoy helping others learn. I have five years experience in programming in Python. I also have experience using several other tools such as Javascript.

Skills

- Software development and testing
- Team work
- Attention to detail
- Problem solving
- Process improvement/simplification
- Manage documents and information
- Administration
- Communication

Tools/Software

- Python
- Javascript
- Figma
- HTML/Tailwind CSS
- Microsoft suite - Teams, Excel, Power Point, Word
- Google applications - Docs, Sheets, Slides

Work Experience

Phonics Heroes November 25 to present

As part of my T-Level Course I have a two day a week work placement.

My daily tasks include

- Talking to the business owner to understand priorities.
- Testing of the app on multiple devices and platforms.
- Recording results of testing, raising tickets with appropriate documentation for any issues found.
- Collaborating with the business owner regarding any identified issues which were not part of test script to prioritise and agree whether tickets need to be raised.
- Generating AI audio
- Creating blog pages for the website in HTML.

- Using a web scraper to tag areas of the website which need updating.
- I have also helped train a new starter on tools used.

Educational Background

Access Creative College

T-Level Level 3 in Software Development - Sept 2024

In my first year I got an A* on my ESP exam getting me a B overall for my exams

In this course I am developing my programming skills in Python, HTML, CSS and Javascript. I have already started developing my Python, HTML and CSS skills. I have developed my knowledge in cyber security and networks.

In my recent year two mock exam I was tasked with making a website for a zoo, this involved me creating a proposal, design document and creating a prototype. I then made a Flask backend for accessing the database I created to store log in details and other user and website data. For the database I had to encrypt sensitive data like passwords so it would follow GDPR. I created a frontend using React which involved coding in Java Script.

So far in this course I have completed several major projects including a Pokedex and multiple websites. Pokedex involved making a GUI and filtering data improving my skills at data handling and Matplotlib which is presenting data using various graph types.

I am currently working on a portfolio website which I have hosted.

Wymondham High School - GCSEs

- Computer Science Grade 7
- Maths Grade 8
- Further Maths Grade 5
- Photography Grade 6
- Physics (Triple Higher) Grade 6
- Chemistry (Triple Higher) Grade 6
- Biology (Triple Higher) Grade 6
- Geography Grade 6
- Food Prep & Nutrition Grade 6
- English Language Grade 4
- English Literature Grade 4

Hobbies

In my spare time I like to play videogames and like to keep fit by going to the gym
